Postdoctoral Research Fellow Position

Articular cartilage repair via gene-based approaches

We are seeking a motivated Postdoctoral Research Fellow to work on an exciting research project aiming at improving articular cartilage repair using gene-based approaches in vitro and in vivo.

The specific project involves up-to-date methods on mesenchymal stem cells, gene therapy, tissue engineering, molecular biology, biochemistry, histology.

We are a young, friendly and dynamic group. Saarland is a great place to live in the middle of Europe, next to Luxembourg and France.
