The Department of Biomedical Engineering at the University of Michigan in Ann Arbor, now a joint department between the College of Engineering and the School of Medicine, is seeking to fill multiple tenured and tenure-track faculty positions at all ranks. Broad areas of interest include neural engineering, molecular and nanoscale engineering, computational and systems physiology, tissue engineering and regenerative medicine, cell and tissue biomechanics, molecular and functional imaging, image guided therapeutics, and diagnostics and therapeutics for personalized medicine, but applications in all areas, particularly those with a strong translational focus or an interest in collaborations with clinical departments, will be considered. We seek candidates who will provide inspiration and leadership in research and teaching and who can leverage the strengths of University of Michigan vibrant and highly-ranked engineering and medical research communities. Qualifications include an earned Ph.D. in engineering or a physical science-related discipline and demonstrated excellence in, or a commitment to, teaching, research, and scholarship. M.D., M.D./Ph.D. candidates are also encouraged to apply. We are especially interested in candidates who can contribute, through their research, teaching and/or service, to the diversity and excellence of the academic community. The University of Michigan is responsive to the needs of dual career families. To apply, please submit application materials, including a CV and research and teaching statements to http://www.bme.umich.edu/about/faculty_recruiting/

Applications will be accepted at anytime, however, preference will be given to applications received prior to Jan. 15, 2013.

The University of Michigan is an Equal Opportunity Affirmative Action Employer.
