Post Doctoral Research Fellow

The Bio-Engineering Laboratory of the Smith Institute for Urology at the North Shore Long Island Jewish Health System in Long Island, NY seeks a candidate for post doctoral research fellowship. The laboratory’s focus is the study of thermodynamic phenomena within cellular systems with a goal to provide novel insight into the structure, function, and health of cells and tissue. The laboratory is located in the Feinstein Institute for Medical Research of the NSLIJ Health System and works in collaboration with the School of Engineering and the School of Medicine of Hofstra University. The candidate will work closely with the surgeon-scientists at the Smith Institute which currently has 13 full time faculty members with research interests in cancer biology, minimally invasive surgery, and robotic engineering. Candidates should have a PhD in Biomedical Engineering, Electrical Engineering with an emphasis on biology and/or physical chemistry. The North Shore Long Island Jewish Health System is an equal opportunity employer.

Interested candidates are encouraged to e-mail or mail their CV and three references to:
Manish A. Vira, M.D. and Louis R. Kavoussi, M.D.
