The Smith Institute for Urology of the North Shore Long Island Jewish Health System in Long Island, NY seeks a PhD at the Assistant or Associate Professor level for the position of Research Director of the BioEngineering Laboratory. The laboratory is located in the Feinstein Institute for Medical Research of the NSLIJ Health System and will work in collaboration with the School of Engineering and the School of Medicine of Hofstra University. Research focuses on the study of thermodynamic phenomena within cellular systems with the goal to provide novel insight into the structure, function, and health of cells and tissue. The ideal candidate would have a Ph.D. in Biomedical or Electrical Engineering. The candidate will work closely with the surgeon-scientists at the Smith Institute which currently has 13 full time faculty members with research interests in cancer biology, minimally invasive surgery, and robotic engineering. The Feinstein Institute houses more than 800 scientists and investigators conducting research in oncology, immunology and inflammation, genetics, psychiatry, neurology, pediatrics, surgery, urology, obstetrics/gynecology and many other specialties. Institute scientists receive funding from multiple sources and the Feinstein is in the top 6th percentile of all NIH grant-receiving institutions. The North Shore Long Island Jewish Health System is an equal opportunity employer.

Interested candidates are encouraged to e-mail or mail their CV and three references to:
Manish A. Vira, M.D. or Louis R. Kavoussi, M.D.
