The Laboratory of Image Analysis within Brain Imaging in the Department of Psychiatry is looking for applications from motivated Postdoctoral Researchers interested in the development of methods for quantification of Positron Emission Tomography (PET) data.

**Location.** The New York State Psychiatric Institute and the Columbia University Medical Center are located in Uptown Manhattan, in New York City, the most populous, fabulous and stimulating city in the USA.

**Expectations.** Candidates should be fluent in English and programming (e.g., Matlab or Python), have a solid mathematical background, and some level of previous experience in parametric and nonparametric modeling, not necessarily in PET.

**Compensation.** The compensation rate for Postdoctoral Researchers is $60,000/year. We will provide help with USA visa processing (for international candidates).

**Application.** Interested candidates are encouraged to send their CV to Dr. Francesca Zanderigo (fz2173@cumc.columbia.edu) or to Dr. Todd Ogden (to166@cumc.columbia.edu). Links to samples of the candidates’ work, such as papers and/or open source projects (e.g., GitHub), will be appreciated.
