

Tokenomics 2023 - 5th International Conference on Blockchain Economics Security and Protocols, October 27-28, 2023, New York, NY hosted by the Columbia Center for Digital Finance and Technologies, and the Briger Family Digital Finance Lab

<https://tokenomics2023.splashthat.com/>

Tokenomics is a premier international forum that focuses on the theory, design, analysis, implementation, and applications of platform economics, blockchains, and smart contracts.

The conference aims to bring together leading economists, computer science researchers, and industry practitioners who are actively working on advancing the field of blockchain economics and technologies. The program offers a unique opportunity to engage with outstanding invited speakers and academic presentations.

This year's conference is hosted by the [Columbia Center for Digital Finance and Technologies](#) and the [Briger Family Digital Finance Lab](#).
